Mines and Mining Stocks

MAY TAKE CREDIT FOR ORE REMOVED

Explained by Late Ruling.

A point which proves a stumbling block to officials of corporations in making credits and charges to determine the amount upon which tax must be paid under the new excise law, according to internal revenue officials, is that which relates to decrease of the value of property by removal of resources. Depreciation in value of mines by the removal of ore, for example, according to a recent ruling, if not otherwise, may be prorated, as in the sales of capital assets.

Increase or decrease during the year in the value of real estate acquired in previous years, sold or held for sale, which cannot be accurately determined, may be prorated, as provided by regulations in cases of sales of capital assets.

Depreciation in value of mines by the removal of ore, if in excess of 5 per cent of investment, must be explained

Estimated depreciation in oil or gas wells, buildings, machinery, etc., must be stated in detail, if exceeding 5 per cent of value as previously invento-Corporations leasing mines and paying royalties on ore mined are not en-titled to deductions for depreciation.

titled to deductions for depreciation.
But corporations owning mines are entitled to allowance for depreciations based upon a fair estimate.

Removal of timber from timber lands while depleting lands to the extent of such removal, is regarded as a charge in the form of assets and not a depreciation within the meaning of the

Deduction on account of depreciation of property must be based upon the lifetime of the property, its cost, value Voluntary removal of buildings, etc., for the purpose of improvements, is not regarded as loss or depreciation, and no deduction therefor should be

Depreciation of a company's stock is a loss to the stockholders, but not a loss to the company issuing the stock, and therefore is not a proper deduction.

AUSTIN HAS STRIKE NEAR DORSEY GROUP

strike of tremendous possibilities in the Double H group of claims, in Austin district, is reported by the Reveille. The property is owned by Henry Hodge, who has opened a five-foot vein, upon the footwall of which is a ten-inch streak of ore which shows values of 150 ounces in silver and \$20 in gold. The entire five feet, it is said, could be mined at a good profit, and indications are that a large quantity of shipping ore will be developed. The property is on the south side of the district, just south of the two groups owned by Coionel W. E. Dorsey of this city. Prospecting in the Dorsey group has disclosed several promising leads and arrangements are being made to inaugurate active development work, which it is believed will be attended by important results.

MONARCH COMPANY IS DRIVING NEW TUNNEL

The prospecting drifts run near the surface of the Seven Troughs Monarch Mining company's property, near Far-rell, are 245 feet from face to face and feet of that distance is ore, according to report received yesterday by Secretary W. H. Tibbals. What was taken by the foreman as an average sample of the dump gave values of \$69.38 a toa. The men performed 91 feet of work in March. Now under way is the driving of a new tunnel, which will attain depth of 250 and 300 feet under the strong ore shoot opened by the upper drifts which are about 50 feet which are about 50 feet from the surface.

EXCHANGE LEADER

Difficult Point in Excise Law Is New Demand Sends It to 151/2c Ore in Great Body Higher and Brightens Entire Market.

> It is not often that encouraging limestone underground adds \$50,000 to the value of a mine over night. But that is literally what happened to Tintic Central. The limestone in this case is mineralized, of course, but it is the significance of its occurrence as indicating pos-sibilities of future development that gives

> Tintic people were on hand early yesterday morning with orders for Tintic Central stock, and the orders were increased during the day. The price was pushed from 11c to 13½c at the forenoon session of the exchange, and in the afternoon it went just as easily to 15½c. ernoon it went just as easily to 15½c. Buying of that stock gave the entire market a better tone. It appeared to give the public courage to "loosen up" as to other issues. Iron Blossom was well bought at \$1.07½ to \$1.10, Colorado was taken over with good grace from 79c to 81c, Sioux Consolidated was in denand at 43½c to 45c, and even Beck Tun-ei brightened up and scored sales at 1½c to 12c. Uncle Sam was quiet at 1½c, and Columbus Consolidated weakened further at 30c to 26c.

Property Is Bringing Best Results.

While the management of the Bingof its Eagle and Blue Bell mine in Tincate that a new mine is being made in the property-one in which greater persistency of the ore bodies than in the The new great ore body in the Red old ground is promised, together with

better average values.

During March the company shipped from the newer ground eighteen carloads of ore, for which approximately \$16,000 will be received from the smelter. This means the company will realize from the mine for the month a lower levels just as it should, according to the tremendous showing where it was opened between the 300 and 400 levels of the winze, said Manager W. J. Merritt, who was in the city yesterday. The ore which is being taken for shipment from the 500-foot level of the inclined winze is a heavier lead ore than that above, and is also richer, but there are no sulphides yet. The volume of the deposit appears to be as great as ever.

The vertical shaft is down 500 feet and a crosscut is being driven for the ore on that level, which is about 125 feet below the 500 level of the winze. Pending the opening of the ore from the vertical shaft, ore is being taken out for shipment at the rate of two and three carloads a week. Production will, of course, be largely increased after the main working shall have been brought into use.

Mr. Merritt confirms the reports which have been coming from Beaver county of the marked improvement of the general mining situation there, especially in the Star district. Such properties as the Moscow, Wild Bill. Harrington Hickory and Hub are showing increased production, while a number of others are displaying strong indications of soon breaking into the shipping class.

Mr. Merritt was accompanied from the reports working shall have been brought into use.

Mr. Merritt confirms the reports which have been coming from Beaver county of the marked improvement of the general mining situation there, especially in the Star district. Such properties as the Moscow, Wild Bill. Harrington Hickory and Hub are showing increased production, while a number of others are displaying strong indications of soon breaking into the shipping class.

Mr. Merritt was accompanied from merch with the best of the old workings are beyond that. The working shalf, or winze, and much of the did workings are beyond that. The working shalf, or winze, and much of the did workings are beyond that. The work from the newer ground eightes to alloads of ore, for which approximately ticked from the newer ground eightes the transition t

The new ore bodies are trending northward. The Chief Consolidated company, that it might make a short cut to a certain portion of its estate, was permitted to drive a drift through the north end of the Eagle and Blue Bell group. That drift opened a body of good lead-silver ore 1600 feet north of the new underground workings of the Eagle and Blue Bell. Indications are that the intervening territory is are that the intervening territory is

are that the intervening territory is all good ore country.

And this brings the Eagle and Blue Bell to the point of requiring new workings, in the interest of economical operations. Near the mouth of its tunnel was sunk several years ago a three-compartment shaft, to the depth of 250 feet. It is not unlikely that the order will be given soon to drop that shaft to the depth of 1500 feet. It will make an ideal working through which to exploit the entire estate, especially to exploit the entire estate, especially saving a great deal of unnecessary

15 handling of the ore taken from the
new part of the mine.

Salt Lakers Expect to Bring Another Neglected District to Notice.

groups of claims, in New Foundland district, and is incorporating the New Foundland Island Mining company. The incorporators of the new company are Jacob Hunter, J. R. Clawson, Frank Hunter, J. W. Duffield and W. R. Hutchinson.

The property which has been taken over was worked out a dozen years ago by former owners, who drove a tunnel 500 feet on a strong vein yielding high-grade copper-gold ore. The ore was not rich enough, however, to stand the long haul to railroad, which has since been materially reduced by the building of the late that since the death of his father, who assisted Professor Agassiz in the development of the northern Michigan mines. R. L. Agassiz studied mining under his father.

Mr. Perkins is a lawyer and a fellow of Harvard university. He is a nephew of the late Charles Perkins of the Chicago, Burlington & Quincy railroad. None of the new appointees is over 42 years old.

TO SHIP TUNGSTEN ORE.

Shipping from the tungsten properties, twelve miles south of Organical Control of the northern Michigan mines. R. L. Agassiz studied mining under his father.

Mr. Perkins is a lawyer and a fellow of the late Charles Perkins of the Chicago, Burlington & Quincy railroad. None of the new appointees is over 42 years old. to railroad, which has since been materially reduced by the building of the Lucin Cutoff and the Western Pacific railroad. Turne Since the work was done the tunnel has six we caved in and is now inaccessible. That caved in and is now inaccessible. That good ore was encountered is attested by a carload of rock on the dumps which is said to average about \$75 a ton in gold and copper. The purchasers of the property further satisfied themselves of its value by sinking on the vein until the same kind of ore was encountered in ore from the old Cave mine in Beaver same kind of ore was encountered in place. Outcroppings indicate a vein of great size and permanency.

Mr. Clawson, who is to be manager of ore carries enough values in copper,

Mr. Clawson, who is to be manager of the new company, intends to go to the camp next week to inaugurate an active campaign of development. The old tunnel is to be cleared out before definite plans for permanent work will be laid. The ore on the dump will be shipped to market and it is not unlikely that extending the tunnel will provide further shipments at not infrequent intervals.

The New Founland district comprises a group of mountains west of Great Salt lake, a neighbor of Silver Island, both having been islands in the ancient sea which covered the Great American desert. New Foundland is not unlike Silver Island in formation and general aspect.

D. C. Jackling wold to make it an attractive fluxing product.

Mining Notes.

C. O. Ellingwood, manager of the Boston branch of the Charles A. Stone-ham & Co. brokerage house, is in the city on the way to Seattle on a vacation trip, made necessary by ill health. He is accompanied by Mrs. Eillingwood.

J. C. Dick has returned from Globe, Ariz., where he has been several weeks looking after mining interests.

D. C. Jackling will leave today in

Island in formation and general aspect, and it has even longer been recognized by mining men as a district of great min-

GOLD CHAIN WORK IS BRINGING NICE RESULTS

the 300-foot level of the old Ajax mine ore was opened right at the line between Ajax and Gold Chain. Since Ajax was taken over by Gold Chain that drift has been extended on the ore and the showing is said to be altogether satisfactory. In Gold Chain ground is a juncture of the Gold Chain vein with the Opohongo vein, in which a massive body of copper ore has been opened by a drift sent out from the 300-foot level of the Black Jack mine. The Opohongo is now extending its drift to connect with Gold Chain workings, it being expected that something out of the ordinary will be encountered at the juncture of the two veins.

Work Toward North End of Bourne Biggest Mine in World in That Event, Says Ely Man.

Jarbidge assuredly has a better surface ham Mines company is saying little showing than any other Nevada mining concerning the improved performance camp, Goldfield not excepted, is the conclusion of H. C. Herrick of Ely, who artic district, authoritative advices indi- rived in this city yesterday direct from the new gold district. That is accounted for, of course, by the veins coming to the surface, making it an ideal camp for the prospector and one in which there is likely to be quick action in the way of development, as soon as conditions permit of systematic development being under-

"A good deal has been said both for and against the Bourne property," said Mr. Herrick, "and I do not hesitate to say in view of the present showing that if the values go down it will be the biggest gold mine in the world. Near the face of the tunnel is a showing of 20 feet of ore that will average \$10 a ton clear across, and that is placing it conservatively. Some who have sampled it give the values at a much higher figure. The values and the indication of servanes or servers increasing. indications of permanency are increasing with every foot of work a ne.

"Other properties with good showings are the Escalon and the Pavlock. The three properties in which the greatest amount of work has been done have all the earmarks of making mines, while a number of others promise to equal their showings with like development accom-plished. New strikes of ore running \$20 and \$50 a ton are of daily occurrence now that disappearance of the snow permits of more prospecting being done. It seems that the district could hardly, fail to make a great high-grade milling camp. The mineral belt is more than 20 miles long.

Miners Not Yet Needed. "One thing which I think should be "One thing which I think should be given the utmost publicity is that workingmen are not yet needed in the camp. The rush has already attracted many miners who expected to get work upon their arrival and a large portion of them have been necessarily disappointed. Extensive development work cannot be undertaken until the wagon road is completed to the camp. A large force of men is working upon the last three-miles stretch, and it is the most important as well as the most is the most important as well as the most difficult part of all. It will be from 20 to 30 days yet before it will be in condition for the hauling of heavy loads.

"There is considerably activity in the way of deals for properties, and that ac-tivity will increase as the snow goes off, permitting of more thorough inspection of surface showings. It is a good time, I elieve, for the investor to get in." Mr. Herrick is manager of the Jarbidge Investment company, a corporation formed by Ely capitalists for the purpose of making investments in the new camp. He has already made a good showing for his company, he says, and he expects to return in a few days with the view of acquiring more property.

Hecla Mining company, was chosen as president in place of Mr. Agassiz. R. L. Agassiz, the late scientist's second Work which promises to direct attention to another of Utah's neglected mining districts is to be undertaken by a crowd of Salt Lake mining men which has taken over the Yellow Jacket and Yankee

ties, twelve miles south of Osceola, Nev., which is under bond to O. A. Turner, will be begun within the next six weeks, it is said. A force of forty men has been employed the last six
